PROFESSIONAL CC TOOLS

## CC Viewer Module

Vela Research continues to make the Closed Captioning test and verification process easier with the introduction of the CCViewer module. The CCViewer is a software module that is included with the Vela ArgoNavis product line and the CineView HDPro Blade. The CCViewer is an intuitive, easy to use application designed to show operators and engineers the 608 and 708 Closed Captioning residing in the User Data of an MPEG-2 or H.264 file and includes professional features such as frame numbers for each Closed Captioning Line and the ability to dump text or raw User Data to a file for debug purposes. Check out the CCViewer on your ArgoNavis Decoder, ArgoNavis Encoder, or CineView HDPro Blade system today.

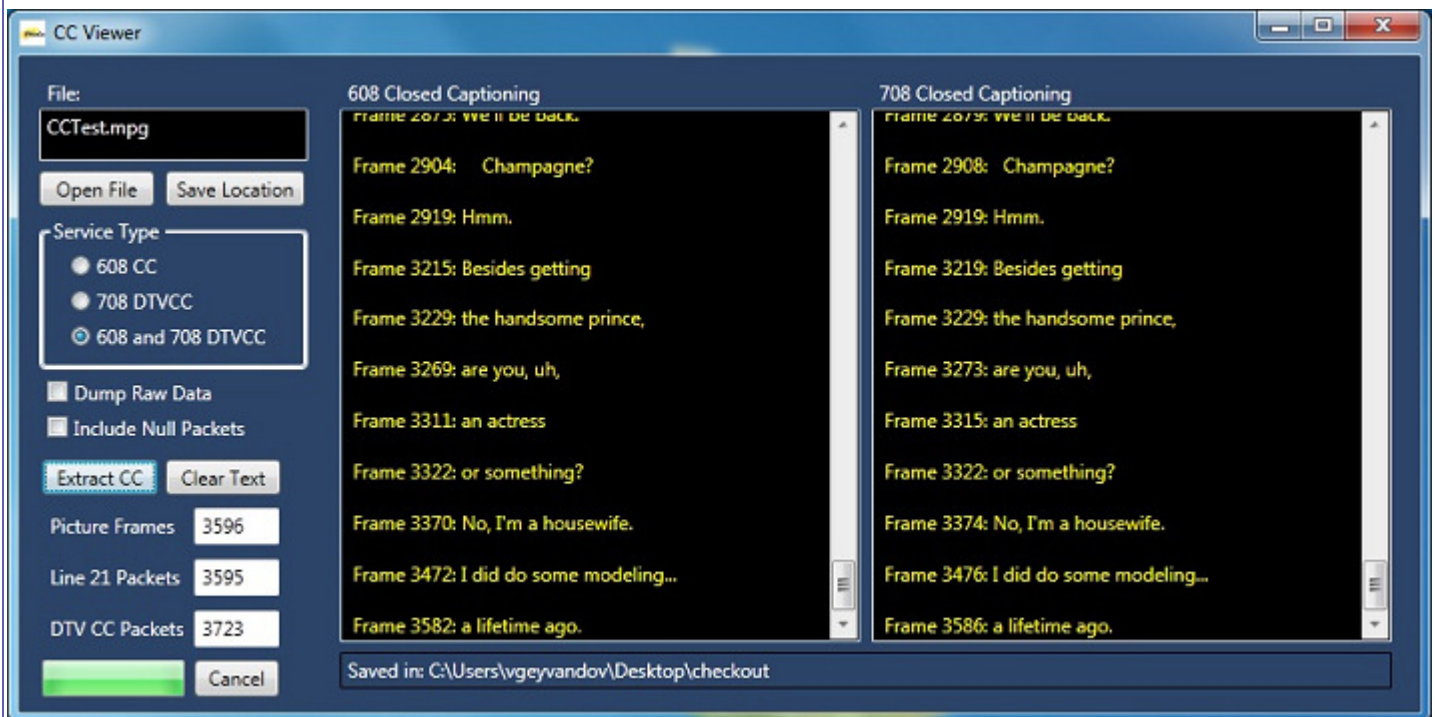

## AT A GLANCE

**VIEW 608 AND 708 CAPTIONS IN A FILE**

**QUICKLY SCAN THROUGH THE CC SCRIPT FOR ERRORS**

**VERIFY FRAME ALIGNMENT**

**DUMP DECODED TEXT OR RAW USER DATA TO A FILE FOR DEBUG PURPOSES**
